

MULTIBUS SYSTEM

MultiBUS

global solution

Highlights

- Flexible and modular multiplexed electrical system based on modules which communicate via CANbus (chassis / body / dashboard).
- Simplifies the Electrical / Electronic Architecture (E/EA) by reducing harnesses and connections (less weight).
- Removes fuses, relays and associated modules.
- Includes protections and diagnostic functions.
- Centralizes the Man Machine Interface (MMI).
- Open to other systems by gateways.
- Interincreases overall reliability.
- Cost reduction compared to conventional electrical system.
